Professional Experience

Procurement Analyst Intern — Roquette

May 2026 – July 2026

- Analysed maize price movements across NCDEX and mandi markets using supply, demand, crop, weather, trade, and end-use data.
- Integrated pricing, production, yield, stocks, weather, trade, and demand data into a Power BI procurement decision-support model.
- Created source-file update instructions and refresh checks for consistent monthly updates without changing model relationships or calculated tables.

Selected Projects

C&D; Waste Lifecycle Analysis — GCL Project

Nov 2025 – Apr 2026

- Mapped C&D; waste workflows through primary and secondary research to identify stakeholder pain points, process gaps, and sustainability challenges.
- Developed a technology-enabled platform concept and evaluated its value proposition, business feasibility, circularity potential, and adoption readiness.

Service Operations & Process Analysis — QSR & Retail

Jul 2025 – Dec 2025

- Used a Gemba walk and time-motion study to identify bottlenecks, 72.88% non-value-added activity, 31-minute customer lead time, and 8.59% process cycle efficiency.
- Redesigned the service workflow and proposed technology-enabled improvements for table allocation, visibility, and pre-ordering.

FakeBreaker — Audio Deepfake Detection Tool

Aug 2023 – May 2024

- Processed 3,695 labelled audio samples and evaluated detection models using accuracy and error metrics.
- Published related research and placed Runners-up at the Global Deepfake Discovery Hackathon.

Evenix — Blockchain-Based Ticketing System

Aug 2023 – May 2024

- Developed transaction validation and traceability mechanisms to protect data integrity and prevent ticket duplication.

Education

PGDM – Business Design

WeSchool (Prin. L.N. Welingkar Institute) | 2025 – 2027 | 8.22 / 10

Major: Design Thinking, Strategy & Consulting · Functional Concentration: Operations

B.E. – Information Technology

Shah & Anchor Kutchhi Engineering College | 2020 – 2024 | 76.20%

Published two research papers · Runners-up, Global Deepfake Discovery Hackathon

Skills & Tools

Operations: Process mapping, workflow analysis, user journey mapping, requirement analysis, process improvement, VA/NVA analysis

Data & problem solving: Data analysis, data validation, dashboard development, supply-demand analysis, business reporting

Tools: MS Excel, PowerPoint, Word, Notion, Power BI, Python

Strengths: Structured thinking, communication, adaptability, teamwork

Certifications & Recognition

- Project Associate Certification Program — Reliance Foundation (2026)
- Leading with Generative AI — Harvard Business Impact Enterprise (2026)
- AI Fluency Framework & Foundation — Anthropic (2026)
- Published research in GIS Science Journal and NFSU Journal of Cyber Security & Digital Forensics
