SUMMARY

With a foundation in Information Technology engineering, I have developed a natural curiosity for how systems, processes, and workflows function at scale. My journey in PGDM – Business Design at WeSchool has strengthened this through design thinking and structured problem solving, enabling me to diagnose ambiguity, improve process visibility, and build execution-focused solutions with analytical depth and practical ownership.

SKILLS

Professional skills: Customer journey mapping, workflow analysis, process diagnostics, VA/NVA analysis, supply chain visibility, workflow digitisation, product requirement thinking, stakeholder communication, project coordination.

Tools & Software: MS Excel, Power BI, Tableau, SQL (Basic), Python (Basic), Figma, Canva, Notion

Soft Skills: Structured thinking, Problem-Solving, Cross-functional Collaboration, Stakeholder Management, Data-Driven Decision Making

PROJECTS EXPERIENCE

Service Operations & Process Analysis – QSR & Retail | WeSchool Jul 2025 – Dec 2025

- Conducted time-motion study and VA/NVA analysis across QSR and retail workflows to identify service bottlenecks, reducing wait-time drivers and improving operational efficiency.
- Recommended process improvement measures including digital workflow redesign and 5S-based workspace changes, enhancing service consistency across ordering and table allocation flows.

Customised Gifting Platform – UX Digitisation Project | WeSchool Nov 2025 – Jan 2026

- Conducted stakeholder research across customers, vendors, and manufacturers to map the supply chain lifecycle, identifying fulfilment gaps and digitisation requirements.
- Developed an AI-enabled order tracking and exception management prototype, improving end-to-end workflow visibility and stakeholder communication.

C&D Waste Lifecycle Analysis – GCL Project | WeSchool Nov 2025 – Present

- Performed supply chain and stakeholder workflow mapping to surface carbon, compliance, and waste-routing gaps in construction and demolition waste management.
- Designed Trace Carbon, an emissions quantification and circularity solution; assessed business viability and adoption readiness using a business model canvas.

FakeBreaker – Audio Deepfake Detection Tool | SAKEC Aug 2023 – May 2024

- Developed an RNN-based machine learning model in Python (3,695 training samples) for deepfake audio classification; published research in GIS Science Journal (Feb 2024).

Evenix – Blockchain based Ticketing System | SAKEC Aug 2023 – May 2024

- Developed a Solidity-based ticketing prototype with smart contract logic for secure issuance, transaction validation, duplication risk reduction, and improved traceability, while assessing its feasibility for fraud prevention in high-volume event ecosystems.

LEADERSHIP & RESPONSIBILITIES

IT Department Student Council | Technical Secretary Feb 2023 – Sep 2023

- Led execution of 6 large-scale events (208 participants) by coordinating cross functional teams, managing logistics, and ensuring smooth on-ground operations.

Google Developer's Student Council | Management Co-head Feb 2023 – Sep 2023

- Planned and executed multi-stakeholder technical workshops, managing timelines, resources, and volunteer coordination.

EDUCATION

PGDM – Business Design 2025 – 2027

WeSchool (S P Mandal's Prin. L. N. Welingkar Institute), Mumbai CGPA: 8.22 / 10

B.E. – Information Technology 2020 – 2024

Shah and Anchor Kutchhi Engineering College, Mumbai 76.20%

CERTIFICATIONS & ACHIEVEMENTS

- Certifications:** Project Associate – Reliance Foundation (2026); Design Thinking for Innovators – Coursera (2025); Prompt Engineering Basics – Coursera (2025)
- Awards:** Runners-up, Global Deepfake Discovery Hackathon – Cyber Peace Foundation (Mar 2024); Top 50, SIH 2025 Internal Hackathon, WeSchool
- Publications:** 2 peer-reviewed papers – GIS Science Journal (Feb 2024); NFSU Journal of Cyber Security & Digital Forensics (Jun 2024)
- Languages:** English, Hindi, Gujarati, Marathi
